

# E-FORMS MODULE

E-Forms is a customizable form builder application designed for manufacturers to easily create forms that match specific requirements to simplify the recording and updating of personnel, equipment and other data.

**Arcstone's E-Forms Module is designed to be easy to use and create quick reports, optimizing business and production operations. E-Forms Module also improves the data recording and updates process and integrates with all Arcstone's other modules and applications, without having to rely on manual entries or data logging.**

## Key Features

### Role & Task Attribution

Customizable form interfaces with a drag-and-drop feature. With standard form properties that are fully flexible depending on the specifications of the user, such as time/date, number, choices, etc, allowing for easy and intuitive designing.

### Workflow Qualification & Access

Configurable Profile settings are available to manage the forms. It also manages accounts who can be assigned to use the forms.

### Manage Records

Manages the records by categorizing the input setting into specific different types of data, such as Input Type, Database Table, Primary Column, etc.

The screenshot shows the 'Form Builder (Maintenance Action Tracker)' interface. It features a grid of input controls on the left, including Text, Password, Machine, Email, Image, Control, Phone No, Price, Date, Time, Date Range, Dropdown, Multi Select, Radio, Checkboxes, Switch, File, Form, Grid, Heading, Paragraph, Label, and Link. The main area displays a form with fields for 'Area/Machine/Equipment', 'Name / Root Cause Impact', and 'Date Closed'.

The screenshot shows the 'Form Configuration (Maintenance Action Tracker)' interface. It displays settings for 'Form Inputs' and 'Database Columns'. The 'Form Inputs' section includes 'LINE', 'MACHINE', 'ITEMS', and 'DATE\_CLOSED'. The 'Database Columns' section includes 'Line', 'Area/Machine/Equipment', 'Name/Root Cause Impact', and 'Select'.

The screenshot shows the 'Edit Profile (Update profile details and input settings)' interface. It displays settings for 'Profile Details' and 'Settings'. The 'Profile Details' section includes 'Name', 'Personal Profile', 'Description', 'Database Table', 'Input Type', 'Custom Query', and 'Optional'. The 'Settings' section includes 'Primary Column', 'Deletion Type', and 'Form Inputs'.

## Why Arcstone?

Arcstone is at the forefront of helping manufacturers gain better visibility and optimization of their production processes through digitalization. We are committed to continuously improving our E-Forms Module to let manufacturers simplify their data recording processes through custom-built forms to optimize your business and production operations.
