ARCSTONE

EQUIPMENT MAINTENANCE SYSTEM

Maximize production efficiency by reducing unplanned downtime and increasing equipment reliability

Arcstone's Equipment Maintenance System enables asset-heavy manufacturers to easily manage equipment and other tools, as well as execute preventative and predictive maintenance. Companies that face strict requirements to perform recurring equipment and systems maintenance will benefit from our solution.

Key Features

Equipment Maintenance System

Comprehensive preventive & predictive maintenance toolset that provides the ability to manage, schedule and execute on maintenance programs for thousands of machines
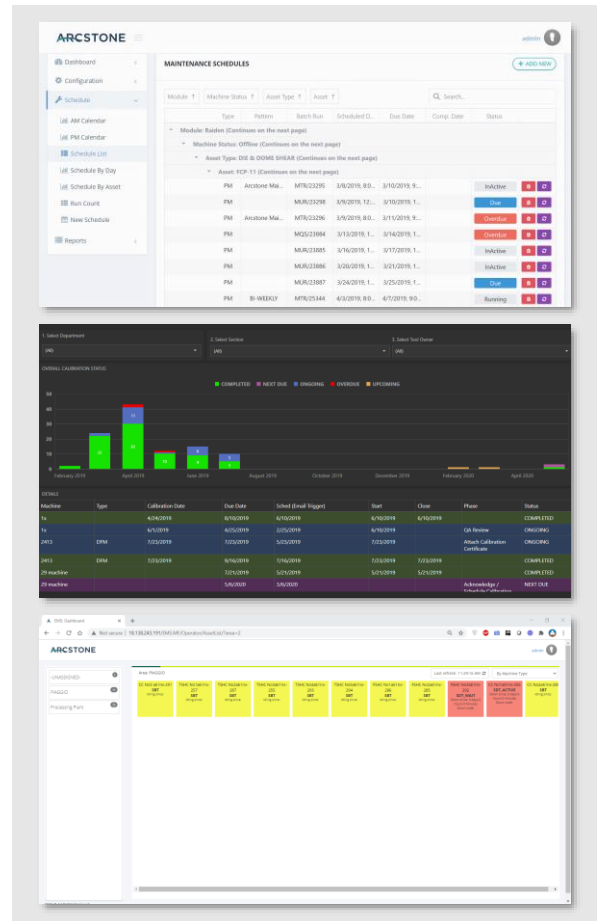

Integrated Asset Management

Provides factory wide visibility into equipment details and allows users to manage the full asset lifecycle in order to guide intelligent strategic planning

Real-time Alerts

Customizable tiered alarms and triggers for email, onscreen and SMS notifications to give maintenance alerts based on meter readings, hours used, fuel used, specific dates, etc.

Why Arcstone?

Arcstone is at the forefront of helping manufacturers gain better visibility and optimization of their production processes through digitization. We are committed to continuously improving our Equipment Maintenance System to give customers the confidence that operations will not be halted unexpectedly by faulty equipment.
