ARCSTONE

REPORTING MANAGER

Gain valuable, real-time insights to your production processes and facility-level documentation with our intuitive reporting toolset

The arc.ops™ **Reporting Manager Module is an easy-to-use tool for noting and recording facility-wide issues and problems with custom write-up forms, images, audio, and video for personnel to utilize for reporting.**

Key Capabilities

Automatic Notification System

The module can automatically send emails with attached reports for key updates such as shift changes and new product completion.

Multiple Databases & Data Sources Links

Pull multiple data sources from a range of databases in real-time into a single report to consolidate key insights to drive decision making.
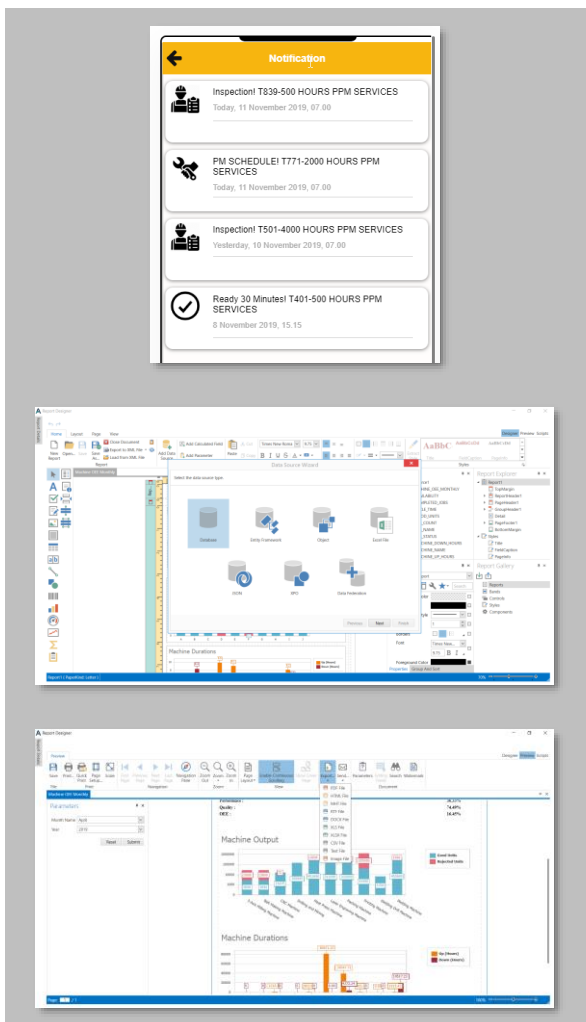

Configurable Report & Template Designs

With a selection of report templates which users can customize easily and configure KPI calculations (e.g., costing, progress, OEE) accordingly. large visuals, such as charts, graphs, grids, tables, designs and layouts can be customized directly by end users.

Real-Time Report Generation and Viewing

By harnessing dynamic data parsed directly from the factory floor through sensors, reports are generated in real-time at any time horizon. Easily view reports in real-time through the online report viewer as well as through emails.

Why Arcstone?

Arcstone is at the forefront of helping manufacturers gain better visibility and optimization of their production processes through digitization. We are committed to continuously improving our Production Visibility solutions to give our customers' production processes an unrivaled advantage through real-time, data-driven insights.
