AutoCount V2.0 is all you need for your daily accounting routine and inventory management to keep your business on track. The V2.0 version strengthens its flagship features for greater improvements and lets you experience new trends.

One Item, Multiple Pricing

Maintain up to 6 selling prices for each item and by debtor's level. By entering standard cost and desired mark ups, the system will auto-calculate and update the new selling price and profit margin for you.

Personalized Layout

Customize the document layout according to your preference or to suit your company's needs. Save and share your frequently used layout template amongst your teammates to save time and minimize repetitive tasks.

Documents Flow Management

Have a bird's eye view of your entire documents flow at a glance. Easy to track and identify the inter-related documents in one single view and zoom in for details.

autocount®
ACCOUNTING

Redesigned Interface with KISS Method

Our Keep-It-Simple-System (KISS) displays all key information in live tiles and dashboard styles. The symbolic icons and buttons make data entry easier.

Total Integration & Scalable

Integrates easily with AutoCount suite of software and unlimited plug-ins from AutoCount Store. You can upgrade the software anytime when your business grows and expands.

Financial Report Writer

The new layout editor allows you to customize nearly any aspect of a financial report. It also comes with report conversion capability to turn data into visually appealing charts and pivot table, or export to excel file for further analysis.

Smart & Quick Searching

Intelligent search function allows you to conduct searches in multiple columns simultaneously. Our google-like search engine is flexible and capable of handling various searching patterns.
